

WE CLAIM:

1. An elastomeric composition, comprising:
a high performance elastomer;
a low performance elastomer; and
a copolymer of the high and low performance elastomers.
2. The elastomeric composition of Claim 1, wherein the copolymer of the high and low performance elastomers comprises a graft copolymer.
3. The elastomeric composition of Claim 1, comprising about 5-95% by weight of the high performance elastomer, about 5-95% by weight of the low performance elastomer, and about 0.1-10% by weight of the copolymer of high and low performance elastomers.
4. The elastomeric composition of Claim 1, comprising about 20-80% by weight of the high performance elastomer, about 20-80% by weight of the low performance elastomer, and about 0.5-7.5% by weight of the copolymer of high and low performance elastomers.
5. The elastomeric composition of Claim 1, comprising about 30-70% by weight of the high performance elastomer, about 30-70% by weight of the low performance elastomer, and about 1.0-5.0% by weight of the copolymer of high and low performance elastomers.
6. The elastomeric composition of Claim 1, wherein the high performance elastomer comprises a styrene-diene block copolymer.
7. The elastomeric composition of Claim 1, wherein the high performance elastomer comprises a styrene-olefin block copolymer.

8. The elastomeric composition of Claim 7, wherein the styrene-olefin block copolymer comprise a selectively hydrogenated styrene-diene block copolymer.

9. The elastomeric composition of Claim 1, wherein the low performance elastomer comprises a single-site catalyzed ethylene-alpha olefin copolymer having a density of about 0.910 grams/cm³ or less.

10. The elastomeric composition of Claim 1, wherein the single site catalyzed ethylene-alpha olefin copolymer has a density of about 0.860-0.900 grams/cm³.

11. A film comprising the elastomeric composition of Claim 1.

12. A fabric comprising the elastomeric composition of Claim 1.

13. A film comprising a layer formed of an elastomeric composition, the elastomeric composition comprising:

about 5-95% by weight of a high performance elastomer;

about 5-95% by weight of a low performance elastomer; and

about 0.1-10% by weight of a graft copolymer of the high and low performance elastomers.

14. The film of Claim 13, wherein the elastomeric composition comprises about 20-80% by weight of the high performance elastomer and about 20-80% by weight of the low performance elastomer.

15. The film of Claim 13, wherein the elastomeric composition comprises about 30-70% by weight of the high performance elastomer and about 30-70% by weight of the low performance elastomer.

16. The film of Claim 13, wherein the elastomeric composition comprises about 0.5-7.5% by weight of the graft copolymer.

17. The film of Claim 13, wherein the elastomeric composition comprises about 1.0-5.0% by weight of the graft copolymer.

18. The film of Claim 13, wherein the high performance elastomer exhibits a hysteresis of 20% or less.

19. The film of Claim 13, wherein the high performance elastomer exhibits a hysteresis of 15% or less.

20. The film of Claim 13, wherein the high performance elastomer exhibits a hysteresis of 10% or less.

21. The film of Claim 13, wherein the low performance elastomer exhibits a hysteresis of 40% or more.

22. The film of Claim 13, wherein the low performance elastomer exhibits a hysteresis of 50-75%.

23. The film of Claim 13, wherein the layer further comprises a filler.

24. A laminate including the film of Claim 13 and a nonwoven web.

25. A fabric comprising at least one layer formed of an elastomeric composition, the elastomeric composition comprising:

about 5-95% by weight of a high performance elastomer;

about 5-95% by weight of a low performance elastomer; and

about 0.1-10% by weight of a graft copolymer of the high and low performance elastomers.

26. The fabric of Claim 25, wherein the at least one layer comprises a plurality of fibers.

27. The fabric of Claim 26, wherein the at least one layer comprises a nonwoven web.

28. The fabric of Claim 26, further comprising a film layer.

29. The fabric of Claim 26, wherein the at least one layer comprises a film, and the fabric further comprises a fibrous layer.

30. The fabric of Claim 29, wherein the fibrous layer comprises a nonwoven web.

31. An elastomeric composition, comprising:
about 5-95% by weight of a high performance elastomer;
about 5-95% by weight of a low performance elastomer; and
about 0.1-10% by weight of a copolymer of the high and low performance elastomers;

wherein the composition is prepared by combining a masterbatch including a relatively higher concentration of the copolymer, with an additional amount of high performance elastomer, low performance elastomer, or high and low performance elastomers.

32. A personal care absorbent article comprising a liquid permeable bodyside liner, a liquid-impermeable outer cover, and an absorbent core between them, wherein at least one of the bodyside liner and outer cover comprises the film of Claim 13.

33. A personal care absorbent article comprising a liquid permeable bodyside liner, a liquid-impermeable outer cover, and an absorbent core between them, wherein at least one of the bodyside liner and outer cover comprises the fabric of Claim 25.

34. A medical article comprising the film of Claim 13.

35. A medical article comprising the fabric of Claim 25.
